

FAASTeam presents:

G1000: Deep into the Map Page

Learning the G1000 includes a mastery of the Primary Flight Display flight instruments, and also developing a working understanding of all the functionality buried in the Multi-Function Display (MFD). The best way to learn G1000 is to spend quality time ON THE GROUND learning about the features available, so that you can spend your time in the air looking outside. In this WINGS safety seminar, we will dive deeply into the main navigation map, Map Chapter Page 1. We will look at the various items that can be overlaid onto the base map, including terrain alerts, radar returns, and topographic info. Much of this information is selected via softkeys and allows the pilot to easily access important visually. Declutter functions are accessible via softkeys as well as selection of which airways to display. But this is only touching the surface! Access the Map menu settings and you'll unlock a world of ability to control the MFD's display of aviation information, and give you the ability to create exactly the display you desire. This seminar is part of San Carlos Flight Center's G1000 series of safety seminars - a regular series investigating various individual aspects of the complex G1000 avionics package. San Carlos Flight Center was voted Best Flight School in the US in the 2013 AOPA Flight

Event Details

Wed, Sep 2, 2015 - 19:00 PDT

San Carlos Flight Center

655 Skyway Road

Suite 215

San Carlos, CA 94070

Contact: San Carlos Flight Center

650-946-1700

Representative DAN KELLY DYER

Training Excellence Awards. We are committed to promoting safety in general aviation through our evening safety seminar programs. For more information about this and any of our weekly seminars, please visit <http://sancarlosflight.com/activities-and-events>.

Directions: Located in the Skyway Building, next to the Hiller Aviation Museum. Parking and entrance behind building. Suite 215 is upstairs in the northwest corner. Pilots who fly in should park in transient parking on the opposite side of the field and call the Flight Center for a ride (650) 946-1700.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
